RHODODENDRONS

Rhododendrons are a specialty with us and we try to grow all species and worthwhile hybrids that we think will prove hardy. All our species and hybrids of proven hardiness here are marked with an asterisk. While all the unmarked kinds have lived over two winters here, we give no guarantee as to their hardiness, but offer them for trial. We endeavor to obtain our seeds from reliable sources, and examine our seedlings closely to determine whether they are true to name, but beyond our being as careful as possible in this matter we assume no responsibility. Many of the newer Chinese species are so much alike that identification of small plants is a difficult matter. However, they are all pretty, and any addition to the meager list of hardy rhododendrons generally offered will be quite an acquisition.

Rhododendron carolinianum	Carolina Rhododendron	
Bears its early pure pink flowers very abundantly.		
2-3 ft.	3 00
